Subject: Utilities Inc Continues its Raw Sewage spills for Tega Cay SC Residents and Lake Wylie
Importance: High

How much sewage is enough before something is done with Utilities Inc? Utilities Inc continues to operate with dis-regard for the law and its services. Utilities Inc will continue to keep paying fines especially when the fines imposed are laughable. The residents of Tega Cay will continue to pay the fines for Utilities Inc with the rate increases they receive. Do we have to wait until someone dies in the lake this year from contamination or choking on raw sewage? Nobody is going to want to use Lake Wylie anymore if this continues along with home owner prices that will fall along with our city tax revenue for improvements decreasing. How hard will the slap on the wrist be this time for a fine? \$210,000 in fines for spills that should have been well over \$500K. What happens to the money received and what is done with it? Why can't the money received from fines go into fixing the problem at hand? I am so tired with the finger pointing and lip service from Utilities Inc and everyone involved in the last 2 years while they continue to receive rate increases and contaminate the ground and the water in Lake Wylie SC. Would all of you like raw sewage in your front yard every time it rains to hard or even snows? I think NOT. It sure would be nice to see some action.
